EDUCATION

Associates of Science in Web Development

San Diego Mesa College

📍 San Diego, CA

- Major GPA: 4.0, Dean's List

PROJECTS

React App - Github API

[Live Website] [Github Link]
- Used Github's public REST API to extract JSON data and display user information such as profile picture, user data and information, and repositories.
- Created using the React library and JavaScript

Angular CRUD App - Watchlist

[Live Website] [Github Link]
- Created web app that accessed Firebase and allows the user to create, edit, and delete database entries.
- Created using the Angular Framework and Firebase

Ecommerce site - 'Simple-Roast'

[Live Website]
- Developed an e-commerce website using WordPress and WooCommerce.
- Designed a style guide for the 'Simple-Roast' brand, creating a visual guide that can be used by contributors to keep brand consistency in current/future projects.

JavaScript Login

[Live Website] [Github Link]
- Created a login system with JavaScript utilizing local and session storage.
- Devised a simple human verification
